How to change the music FS19/FS22 game home page

Step 1 :

Make a copy of the original game audio on your desktop or in your documents, but don't worry, it's in the file in case of errors!

☐ It is available in under the name "original_menu"

Step 2 :

Put the new_menu.ogg file in the local FS19/FS22 file by following these lines of code below:

- *for FS19:* `C:\Program Files (x86)\Farming Simulator 2019\data\music`

- *for FS22:* `C:\Program Files (x86)\Farming Simulator 2022\data\music`

☐ *It is available in under the name "new_menu"*

Step 3 :

Don't forget to change the file name for it to work! The name "new_menu" needs to be changed to "menu" for it to work on both games.

Without this, the game will no longer have sound.

Enjoy and have a good game everyone !
